

Diagnostic Imaging Pathways - Disclosure of Conflict of Interest

Disclosure of Conflict of Interest

The Chair and members of the Editorial Panel are required to complete and sign a 'Conflict Of Interest Disclosure Form'. The Chair and each member of the Editorial Panel is required to identify all relevant relationships within the last 2 years that may result in a conflict of interest. A relationship is deemed to be 'relevant' if there is reasonable potential for financial, professional, or other personal gain or loss for the individual, members of the individual's household and/or employer, biasing the development, review and finalisation of materials including recommendations.

Conflict of Interest Disclosure Form

Each contributor to the content of Diagnostic Imaging Pathways is required to identify all **relevant** relationships within the last 2 years that may result in a conflict of interest.

A relationship is 'relevant' if there is reasonable potential for financial, professional, or other personal gain or loss for you, members of your household and/or your employer, **biasing** the development, review and finalisation of materials including recommendations. Such a conflict of interest will not necessarily preclude contributions.

A register of Conflict of Interest Disclosure Forms is maintained by the Manager. The register alerts the Manager to the requirement to update disclosures every two years.
